

Leica iCON gps 30

Provides access to the quality and performance of the iCON GNSS system.

Leica iCON gps 30: A compact and reliable mobile GNSS RTK for the construction sector.

Access point to the quality of Leica iCON GNSS:

Easy to use and equipped with Leica iCON site field software, specifically designed for the construction sector, iCON gps 30 facilitates access to the Leica iCON GNSS range.

Lightest in its class:

Thanks to its lightweight, compact, and well-balanced design, it is comfortable to use and easy to carry in the field.

Reliable and precise measurement results:

With the highest position reliability in its category, iCON gps 30 provides accurate results and increases productivity.

We initiate the first step to access the iCON workflow from Leica for the construction sector, thanks to the Leica Geosystems mobile RTK GNSS device. The iCON gps 30 is designed to help construction companies transition from traditional surveying and measurement methods to modern digital techniques. Experience faster workflows, precise results, and increased efficiency in construction projects, utility construction, land subdivisions, and road construction. Using advanced RTK technologies, the mobile device consistently provides accurate and reliable positions. Integrated with the renowned Leica iCON site software, specifically designed for the construction sector, the iCON gps 30 speaks the same language as construction professionals.
